A Long-Term Case for Stocks

By E.S. Browning

Updated September 12, 2011

Gift unlocked article

As stocks plunged last week, investors focused on the risk of recession and another market collapse.

Richard Sylla sees something very different over the longer term: the much-longer term.

A Better Future?

NYU Prof. Richard Sylla, who accurately forecast the market weakness of the past decade, thinks things will get better in the next decade.

Note: Annual returns calculated as 10-year averages, including dividends, inflation-adjusted
